Table of Contents

Experimental and Theoretical Studies

A Review of Theoretical and Experimental Results on Schemata in Genetic Programming	1
<i>R. Poli and W. B. Langdon</i>	
Where Does the Good Stuff Go, and Why? How Contextual Semantics Influences Program Structure in Simple Genetic Programming	16
<i>D. E. Goldberg and U.-M. O'Reilly</i>	
Fitness Causes Bloat: Mutation	37
<i>W. B. Langdon and R. Poli</i>	
Concepts of Inductive Genetic Programming	49
<i>N. I. Nikolaev and S. Slavov</i>	

Algorithms, Representations and Operators

Immediate Transfer of Global Improvements to All Individuals in a Population Compared to Automatically Defined Functions for the EVEN-5,6-PARITY Problems	60
<i>R. Aler</i>	
Non-destructive Depth-Dependent Crossover for Genetic Programming	71
<i>T. Ito, I. Iba and S. Sato</i>	
Grammatical Evolution: Evolving Programs for an Arbitrary Language ...	83
<i>C. Ryan, J.J. Collins and M. O'Neill</i>	
Genetic Programming Bloat with Dynamic Fitness	97
<i>W. B. Langdon and R. Poli</i>	

Applications

Speech Sound Discrimination with Genetic Programming	113
<i>M. Conrods, P. Nordin and W. Banzhaf</i>	
Efficient Evolution of Asymmetric Recurrent Neural Networks Using a PDGP-inspired Two-Dimensional Representation	130
<i>J. C. Figueira Pujol and R. Poli</i>	
A Cellular-Programming Approach to Pattern Classification	142
<i>G. Adorni, F. Bergenti and S. Cagnoni</i>	

Evolving Coupled Map Lattices for Computation	151
<i>C. Andersson and M. G. Nordahl</i>	

Posters

Genetic Programming for Automatic Design of Self-Adaptive Robots	163
<i>S. Calderoni and P. Marcenac</i>	
Genetic Modelling of Customer Retention	178
<i>A. E. Eiben, A. F. Koudijs and F. Slisser</i>	
An Evolutionary Hybrid Metaheuristic for Solving the Vehicle Routing Problem with Heterogeneous Fleet	187
<i>L. S. Ochi, D. S. Vianna, L. M. A. Drummond and A. O. Victor</i>	
Building a Genetic Programming Framework: The Added-Value of Design Patterns	196
<i>T. Lenaerts and B. Manderick</i>	
Evolutionary Computation and the Tinkerer's Evolving Toolbox	209
<i>P. G. K. Reiser</i>	
A Dynamic Lattice to Evolve Hierarchically Shared Subroutines	220
<i>A. Racine, M. Schoenauer, P. Dague</i>	

Lecture Notes in Computer Science

This series reports new developments in computer science research and teaching, quickly, informally, and at a high level. The timeliness of a manuscript is more important than its form, which may be unfinished or tentative. The type of material considered for publication includes

- drafts of original papers or monographs,
- technical reports of high quality and broad interest,
- advanced-level lectures,
- reports of meetings, provided they are of exceptional interest and focused on a single topic.

Publication of Lecture Notes is intended as a service to the computer science community in that the publisher Springer-Verlag offers global distribution of documents which would otherwise have a restricted readership. Once published and copyrighted they can be cited in the scientific literature.

Manuscripts

Lecture Notes are printed by photo-offset from the master copy delivered in camera-ready form. Manuscripts should consist of no fewer than 100 and preferably no more than 500 pages of text. Authors of monographs and editors of proceedings volumes receive 50 free copies of their book. Manuscripts should be printed with a laser or other high-resolution printer onto white paper of reasonable quality. To ensure that the final photo-reduced pages are easily readable, please use one of the following formats:

From size (points)	Printing area		Final size %
	(cm)	(inches)	
10	12.2 x 19.3	4.8 x 7.6	100
12	15.3 x 24.2	6.0 x 9.5	80

On request the publisher will supply a leaflet with more detailed technical instructions or a T_EX macro package for the preparation of manuscripts.

Manuscripts should be sent to one of the series editors or directly to:

Springer-Verlag, Computer Science Editorial II, Tiergartenstr. 17,
D-69121 Heidelberg, Germany
