DETERMINATION OF HUMAN LYSOZYME IN BODY FLUIDS

METHODOLOGICAL ASPECTS

BY

PERTTI MÖRSKY

Academic Dissertation

*To be presented with the permission of the Faculty of Science
of the University of Helsinki, for public criticism in the auditorium
of the Department of Biochemistry, Unioninkatu 35,
on October 27th, 1989, at 12 o'clock noon.*

HELSINKI 1989

CONTENTS

1. INTRODUCTION	7
2. REVIEW OF THE LITERATURE	9
2.1. Distribution and turnover of human lysozyme	9
2.1.1. Lysozyme in tissues and body fluids	9
2.1.2. Catabolism	12
2.2. Biological functions of human lysozyme	13
2.3. Purification and molecular characteristics	14
2.3.1. Purification methods	14
2.3.2. Assessment of purity	16
2.3.3. Molecular structure	17
2.4. Enzymology of human lysozyme	18
2.4.1. Substrates and enzyme-substrate interactions	18
2.4.2. Activators and inhibitors	22
2.4.3. Effects of pH, ionic strength and temperature	23
2.4.4. Association of lysozyme with macromolecules	25
2.5. Quantitative determination of human lysozyme based on the lysis of <i>Micrococcus luteus</i> cells	26
2.5.1. Photometric measurements	26
2.5.2. Lysoplate and lysorocket techniques	27
2.5.3. Use of labelled <i>Micrococcus luteus</i> cells or peptidoglucan	29
2.6. Determination of lysozyme by means of synthetic substrates	30
2.7. Immunochemical determination of human lysozyme	32
2.7.1. Quantitative immunoprecipitation methods	32
2.7.2. Immunoassays employing labels	34
2.8. Clinical value of lysozyme assays	35
3. AIMS OF THE PRESENT STUDY	38
4. MATERIALS AND METHODS	39
4.1. Purification of human lysozyme	39
4.2. Assessment of the kinetics of human lysozyme in respect of <i>Micrococcus luteus</i> cells	39
4.3. Quantitative assays for lysozyme	40
4.4. Immunoblotting	41
4.5. Body-fluid samples used for the evaluation of reference values	41
4.6. Clinical samples	42
4.7. Statistical methods	43

5. RESULTS	44
5.1. Purification	44
5.2. Kinetic studies	44
5.3. Analytical performance of the lysozyme assays	45
5.4. Reference intervals	46
5.5. Urinary lysozyme in patients treated with tobramycin	48
5.6. Lysozyme complexes	48
6. GENERAL DISCUSSION	49
6.1. Methodological considerations on lysozyme assays	49
6.2. Reference values for human lysozyme in body fluids	51
6.3. Problems associated with the determination of urinary lysozyme	53
6.4. Formation of lysozyme complexes - analytical and metabolic consequences	54
7. SUMMARY	56
8. ACKNOWLEDGEMENTS	58
9. REFERENCES	60
10. ORIGINAL COMMUNICATIONS	75
