TABLE OF CONTENTS

Preface

ix

1

Introduction to Cell and Molecular Biology **1**

Introduction	2
1.1 The Cellular basis of Life	3
1.1.1 What is Cell Theory?	3
1.1.2 The History of Cell Theory	6
1.1.3 The Nature and Function of Cells	13
1.1.4 The Molecules of Cells	14
1.1.5 The Genetic Information of Cells.....	21
1.1.6 The Organization of Cells.....	23
1.2 Different Cell Types	27
1.2.1 Prokaryotic Cells	27
1.2.2 Eukaryotic Cells	31
1.3 Techniques and Methods of Studying Cells	32
1.3.1 Immunofluorescence Microscopy	32
1.3.2 Ion-Exchange Chromatography	33
1.3.3 Affinity Chromatography	34
1.3.4 Partition and Adsorption Chromatography	34
1.3.5 Gel Filtration Chromatography	35
1.3.6 Radioactive Tracer Technique	36
1.3.7 Radioimmunoassay (RIA)	38
1.3.8 Enzyme Immunoassay	39

1.3.9 Spectroscopy	39
1.3.10 Nuclear Magnetic Resonance Spectroscopy (NMR)	40
1.3.11 Optical Rotatory Dispersion (ORD) and Circular Dichroism (CD) .	41
1.3.12 Infra-red (IR) Spectrophotometry.....	42
1.3.13 Atomic Absorption/ Flame Spectrometry	42
1.3.14 Flow Cytometry	43
1.3.15 Applications of Flow Cytometer and Cell Sorter	43
1.3.16 Non-invasive Scanning of Soft Tissues.....	44
Multiple Choice Questions	46
Review Questions	47
References	47

2

Cytoskeleton 49

Introduction	50
2.1 Overview of Cytoskeleton	51
2.1.1 Cytoskeleton: Structure and Movement.....	52
2.1.2 Microtubules.....	57
2.2 Cell Cycle	72
2.2.1 Phases of Cell Cycle.....	73
2.2.2 Mitosis	75
2.2.3 Meiosis.....	80
2.2.4 Difference between Mitosis and Meiosis.....	83
Multiple Choice Questions	86
Review Questions	87
References	87

3

Plasma Membrane 89

Introduction	90
3.1 Plasma Membrane	91
3.1.1 Structure of Plasma Membrane	91
3.1.2 Functions of Plasma Membrane	92
3.2 Fluid Mosaic Model.....	92
3.2.1 Phospholipids.....	94
3.2.2 Proteins.....	95
3.2.3 Carbohydrates	97
3.3 Membrane Lipids and Membrane Fluidity.....	97
3.3.1 The Importance of Membrane Fluidity	99
3.3.2 Maintaining Membrane Fluidity	100

3.3.3 Lipid Rafts.....	101
3.4 Membrane Transport.....	102
3.4.1 Passive Transport.....	103
3.4.2 Active Transport.....	114
3.4.3 Bulk Transport.....	119
Multiple Choice Questions.....	124
Review Questions.....	124
References.....	125

4

The Nucleus 127

Introduction.....	128
4.1 Concept of Nuclear Envelope.....	129
4.1.1 Structure of Nuclear Pore Complex.....	130
4.1.2 Nuclear Lamina.....	131
4.1.3 Nuclear Lamina Functions.....	132
4.2. Transport across Nuclear Envelope.....	133
4.2.1 Chromatin.....	134
4.2.2 Histones.....	135
4.2.3 Chromatin Immunoprecipitation (ChIP).....	141
4.2.4 Molecular Organization.....	143
4.2.5 Nucleolus Processing.....	145
4.2.6 Processing of rRNA.....	146
4.2.7 Nuclear Matrix.....	149
4.3 The Dividing Nucleus.....	150
4.3.1 The Cell Cycle.....	150
4.3.2 Mitosis.....	152
4.3.3 Meiosis.....	154
4.3.4 The Chromosomes.....	156
4.3.5 Cell Death.....	161
4.3.6 Cellular Differentiation and Proliferation.....	162
Multiple Choice Questions.....	165
Review Questions.....	166
References.....	166

5

Cell Growth and Cell Division 167

Introduction.....	168
5.1 Cell Growth.....	168
5.1.1 The Process of Growth.....	169

5.1.2 Types of growth	170
5.1.3 Normal and Abnormal Growth	172
5.1.4 Factors that Regulate Growth	174
5.1.5 The Dynamics of Growth.....	178
5.1.6 The Study of Growth.....	179
5.2 Cell Cycle	180
5.2.1 Phases of Cell Cycle.....	181
5.2.2 M Phase	183
5.2.3 Meiosis.....	188
5.3 The Cell Division Cycle.....	192
5.3.1 Controlled Proliferation.....	192
5.3.2 Failure of Proliferation Control	193
5.4 Cell Differentiation	194
5.4.1 The Differentiated State	196
5.4.2 The Process of Differentiation.....	198
5.4.3 Errors in Differentiation.....	201
5.5 Gametogenesis	201
5.5.1 Spermatogenesis	202
5.5.2 Oogenesis	203
Multiple Choice Questions	205
Review Questions	205
References	206

6

DNA Structure and Function 207

Introduction	208
6.1 Genetic Material	208
6.1.1 Structure of Nucleic Acids (Polynucleotides).....	209
6.2 Deoxyribonucleic Acid (DNA).....	210
6.2.1 DNA Types.....	212
6.2.2 Discovery of DNA.....	212
6.2.3 DNA Diagram	214
6.2.4 DNA Structure.....	214
6.2.5 Functions of DNA	216
6.3 DNA Replication	217
6.3.1 Models of Replication.....	218
6.3.2 DNA Replication in Prokaryotes	221
6.3.3 DNA Replication in Eukaryotes.....	223
6.3.4 Telomere Replication.....	227

6.4 DNA Repair	229
6.4.1 Without DNA Repair, Spontaneous DNA Damage Would Rapidly Change DNA Sequences	231
6.4.2 The DNA Double Helix Is Readily Repaired	233
6.4.3 DNA Damage Can Be Removed by More Than One Pathway ...	234
6.4.4 The Chemistry of the DNA Bases Facilitates Damage Detection	236
6.4.5 Double-Strand Breaks are Efficiently Repaired	238
6.4.6 Cells Can Produce DNA Repair Enzymes in Response to DNA Damage	239
6.4.7 DNA Damage Delays Progression of the Cell Cycle	241
Multiple Choice Questions	242
Review Questions	243
References	243

7

Repair of RNA 245

Introduction	246
7.1 RNA (Ribonucleic Acid).....	247
7.1.1 Structure and Composition of RNA.....	248
7.1.2 Comparison between DNA and RNA.....	253
7.1.3 Types of RNA.....	255
7.1.4 Other Types of RNA	266
7.2 RNA Ligases and RNA Repair	268
7.2.1 Fungal tRNA Splicing as a Paradigm of RNA Repair	269
7.2.3 tRNA Ligase as Antifungal Drug Target	271
7.3 RNA Repair: Damage Control	271
7.3.1 AlkB Reverses Alkylation Damage	272
7.3.2 Coping with RNA Damage	274
7.3.3 Anti-Cancer Chemotherapy and RNA Damage.....	275
7.3.4 RNome Stability: A Link to Cancer?	276
Multiple Choice Questions	277
Review Questions	278
References	279

8

Analysis of Gene Expression Using Molecular Biology 281

Introduction	282
8.1 Analysis of Gene Expression	283
8.2 Polymerase Chain Reaction (PCR)	286

8.2.1 Factors Affecting PCR	286
8.2.2 Types of PCR.....	287
8.3 Southern Blotting	288
8.3.1 Principle	288
8.3.2 Procedure	289
8.3.3 Applications.....	291
8.4 Western Blotting	291
8.5 Real Time PCR.....	294
8.5.1 Non-specific Detection using DNA Binding Dyes	296
8.5.2 Specific Detection using Target Specific Probes	297
8.5.3 Real Time PCR VS Traditional PCR	297
8.5.4 Limitations of End-point PCR.....	297
8.6 Microarray	298
8.6.1 Microarray Technique	298
8.6.2 Types of Microarrays.....	299
8.6.3 Applications.....	300
8.7 Recombinant DNA Technology	300
8.7.1 Preparation of Recombinant DNA Technology.....	302
8.7.2 Types of Restriction Enzymes	304
8.8 Sanger Sequencing.....	304
8.8.1 Method of Sanger Sequencing	305
8.8.2 Uses and Limitations.....	306
8.9 Next-Generation Sequencing	307
8.10 Cell Culture Methods.....	307
8.10.1 Significance of Cell Culture.....	309
8.10.2 Types of Primary Cells	310
8.10.3 Types of Culture Media	310
Multiple Choice Questions	313
Review Questions	314
References	315
