TABLE OF CONTENTS

Preface xi

1

Introduction to Biology **1**

Introduction	2
1.1 Themes and Concepts of Biology	3
1.1.1 Properties of Life.....	3
1.1.2 Levels of Organization of Living Things.....	7
1.1.3 The Diversity of Life.....	10
1.1.4 Branches of Biological Study.....	12
1.2 Historical Development of Biology.....	14
1.2.1 The Early Heritage.....	14
1.2.2 Advances to the 20th Century.....	26
1.2.3 Biology in the 20th and 21st Centuries	40
Multiple Choice Questions	47
Review Questions	47
References	48

2

Chemistry of Life **49**

Introduction	50
2.1 Overview of Structure of Atoms and Molecules.....	51
2.1.1 Subatomic Particles (Protons, Electrons, Neutrons).....	52
2.1.2 Molecules and Ions.....	54

2.1.3 Chemical Formulas and Naming Compounds	57
2.2 Chemical Bonds and Interactions (Covalent Bonds, Hydrogen Bonds, etc.).....	62
2.2.1 Ionic Bonding	64
2.2.3 Some Ion Formulas	68
2.2.4 Formulas.....	69
2.2.5 Structure.....	70
2.2.6 Covalent Bonds	73
2.2.7 Hydrogen Bonds	75
2.2.8 Organic Compounds	77
2.3 Properties of Water and its Importance in Biological Systems	79
2.3.1 The Molecular Make-up of Water.....	80
2.3.2 Water is the “Universal Solvent”	81
2.3.3 Water Supports Cellular Structure	82
2.3.4 Chemical Reactions of Water.....	84
2.4 Organic Molecules (carbohydrates, lipids, proteins, nucleic acids) and their functions.....	85
2.4.1 How to draw Organic Molecules	87
2.4.2 Structural Formulae.....	88
2.4.3 Saturated vs. Unsaturated Molecules	92
2.4.4 Calculating Degrees of Unsaturation (DoU).....	93
Multiple Choice Questions	96
Review Questions	96
References	97

3

Cell Structure and Function 99

Introduction	100
3.1 Cell Theory.....	100
3.1.1 The History of the Cell Theory	102
3.1.2 Cell Processes	103
3.1.3 Postulates of the Cell Theory	104
3.1.4 Cell Theory Important for Biology	105
3.1.5 Properties of Cells.....	106
3.2 Prokaryotic Vs. Eukaryotic Cells	111
3.2.1 Prokaryote Definition.....	111
3.2.2 Prokaryotic Cell Features.....	112
3.2.3 Eukaryote Definition	113
3.2.4 Eukaryotic Cell Features	113

3.2.5 Comparing Prokaryotes and Eukaryotes	114
3.2.6 Key Similarities between Prokaryotes and Eukaryotes.....	115
3.2.7 Key Differences between Prokaryotes and Eukaryotes.....	116
3.3 Structure and Function of a Cell.....	116
3.3.1 Cell Membrane (Plasma Membrane)	117
3.3.2 Cell Wall	119
3.3.3 The Cytoplasm and the Cell Organelles.....	120
3.3.4 Nucleus (The Hereditary Organelle)	128
Multiple Choice Questions	130
Review Questions	130
References	131

4

Cell Metabolism 133

Introduction.....	134
4.1 Enzymes	134
4.1.1 Competitive Inhibition.....	136
4.1.2 Enzyme Cofactors	136
4.1.3 Factors Affecting Enzyme Action	138
4.1.4 Regulation of Enzyme Activity.....	139
4.1.5 Precursor Activation.....	140
4.1.6 Regulation of Enzyme Synthesis	140
4.2 ATP.....	141
4.2.1 Energy.....	141
4.2.2 Synthesis of ATP.....	142
4.2.3 Consumption of ATP	142
4.2.4 Extracellular ATP	143
4.3 Cellular Respiration.....	143
4.3.1 Mitochondria	143
4.3.2 The Matrix.....	145
4.3.3 The Citric Acid Cycle.....	145
4.3.4 The Electron Transport Chain	146
4.3.5 Chemiosmosis in Mitochondria.....	147
4.3.6 How Many ATPs?	148
4.3.7 Mitochondrial DNA (mtDNA).....	149
4.4 Photosynthesis.....	150
4.4.1 The Steps that Lead to Photosynthesis	151
4.4.2 Calvin's Experiment.....	152
4.4.3 Photosynthesis - The Role of Light.....	154

4.4.4 Photosynthesis - Discovering the Secrets.....	160
4.5 Metabolism	165
4.5.1 Metabolic Process.....	166
4.5.2 Nutrition and Energy	167
4.5.3 Autotrophic vs. Heterotrophic Nutrition	167
4.5.4 Carbohydrates in Metabolism.....	168
4.5.5 Proteins in Metabolism	168
4.5.6 How to Increase Metabolism?.....	169
4.5.7 How Humans (and Other Animals) Do It.....	169
4.5.8 Intermediary Metabolism	171
Multiple Choice Questions.....	174
Review Questions	174
References	175

5

Genetics 177

Introduction.....	178
5.1 Concept of Genetics.....	180
5.1.1 How genes work	181
5.1.2 Chromosomes.....	185
5.1.3 Chromosome Banding	196
5.2 Genetic Inheritance: Mendelian and Non-Mendelian Patterns.....	198
5.2.1 Mendelian Inheritance	198
5.2.2 Non Mendelian Inheritance	203
5.3 Gene and Mechanism of Gene Action	209
5.4 DNA Replication.....	212
5.4.1 The Basic Idea.....	212
5.4.2 DNA polymerase	213
5.4.3 Starting DNA Replication	214
5.4.4 Primers and Primase	215
5.4.5 Leading and Lagging Strands.....	215
5.4.6 The Maintenance and Cleanup Crew	216
5.4.7 Summary of DNA replication in <i>E. coli</i>	217
5.4.8 DNA Replication in Eukaryotes.....	217
5.5 The Central Dogma	218
5.5.1 The Central Dogma: DNA Encodes RNA, RNA Encodes Protein	218
5.5.2 Transcription: DNA to RNA.....	218
5.5.3 Translation: RNA to Protein	219
5.5.4 Recombinant DNA Technology	219

Multiple Choice Questions 221
Review Questions 222
References 222

6 Evolution and Natural Selection 225

Introduction 226
6.1 The Concept of Darwin 227
 6.1.1 Darwin and the Voyage of the Beagle 227
 6.1.2 Evolution by Natural Selection 228
 6.1.3 Darwin's Inventiveness 230
 6.1.4 Evidence for the Theory of Evolution 231
 6.1.5 Examples of Natural Selection in Real Time 232
 6.1.6 Recent Research on Evolution by Natural Selection 234
6.2 The Basis For Natural Selection 235
 6.2.1 The Prodigality of Nature 235
 6.2.2 Factors the Limit the Reproductive Potential 235
 6.2.3 Variability in Population 237
6.3 Lamarckism 238
 6.3.1 Theory of Inheritance of Acquired Characters 238
 6.3.2 Evidences in Favor of Lamarckism 239
 6.3.3 Criticism of Lamarckism 240
6.4 Sources and Expression of Variability 240
 6.4.1 Sources of Variability 241
 6.4.2 Expression of Variability 245
6.5 Natural Selection Under Different Environmental Conditions 247
 6.5.1 Action of Natural Selection in Uniform Environments
 (Normalizing Selection) 248
 6.5.2 Action of Natural Selection of Heterogeneous Environments
 (Disruptive Selection) 251
6.6 Sexual Selection 252
6.7 Kin And Group Selection 254
 6.7.1 Kin Selection 255
 6.7.2 Group Selection 257
Multiple Choice Questions 258
Review Questions 259
References 260

7**Ecology****263**

Introduction.....	264
7.1 Levels of Ecological Organization.....	265
7.1.1 Organisms.....	265
7.1.2 Population.....	266
7.1.3 Biological Community.....	266
7.1.4 Ecosystem.....	267
7.1.5 Landscape.....	268
7.1.6 Biome.....	268
7.1.7 Biosphere.....	268
7.2 Energy Flow and Nutrient Cycling in Ecosystems.....	269
7.2.1 Nutrient Flows and Cycles.....	269
7.2.2 The Soil Ecosystem.....	272
7.2.3 The Importance of Soil.....	275
7.2.4 The Carbon Cycle.....	276
7.2.5 The Nitrogen Cycle.....	277
7.2.6 The Phosphorus Cycle.....	281
7.2.7 The Sulphur Cycle.....	284
7.3 Population Dynamics.....	286
7.3.1 Patterns of Population Growth.....	286
7.3.2 Overpopulation.....	289
7.4 Community Ecology.....	291
7.4.1 The Trophic Pyramid.....	291
7.4.2 Ecological Succession.....	292
7.4.3 Ecological Niches.....	293
7.4.4 Guilds.....	293
7.4.5 Interactive Relationships.....	293
Multiple Choice Questions.....	300
Review Questions.....	301
References.....	302

8**Biodiversity and Conservation****305**

Introduction.....	306
8.1 Concept Of Biodiversity.....	308
8.1.1 Types of Biodiversity.....	312
8.2 Biodiversity and its Value for Environment.....	315
8.2.1 Species Diversity.....	316

8.2.2 Genetic Diversity.....	317
8.2.3 Value of Biological Diversity	317
8.2.4 The Source of Biodiversity Decline	320
8.3 Conservation of Biodiversity.....	320
8.3.1 Need for conservation.....	320
8.3.2 Conservation has three specific objectives	321
8.3.3 Conservation of Biodiversity.....	321
8.4 Climate Change in Biodiversity.....	322
8.5 Major Causes for the Loss pf Biodiversity	328
8.5.1 Destruction of Habitat.....	329
8.5.2 Exploitation of Selected Species.....	329
8.5.3 Habitat Fragmentation.....	331
8.5.4 Collection for Zoo and Research.....	332
8.5.5 Introduction of Exotic Species.....	332
8.5.6 Pollution	333
8.5.7 Control of Pests and Predators	334
8.5.8 Natural Calamities.....	334
8.5.9 Other Factors	334
Multiple Choice Questions.....	335
Review Question.....	336
References	337
