Soil Quality Standards for Trace Elements

*Derivation, Implementation,
and Interpretation*

Edited by
Graham Merrington and Ilse Schoeters 070088

Contents

List of Figures	xi
List of Tables	xiii
Acknowledgments	xv
About the Editors	xvii
Workshop Participants	xix

Chapter 1	Workshop on Deriving, Implementing, and Interpreting Soil Quality Standards for Trace Elements	1
	<i>Graham Merrington and Ilse Schoeters</i>	
1.1	Introduction to the Workshop	1
1.2	Deriving, Implementing, and Interpreting SQS for TEs	3
1.3	Aims and Objectives of the Meeting	5
	References	5
Chapter 2	Derivation of Ecologically Based Soil Standards for Trace Elements	7
	<i>Mike J. McLaughlin, Steve Lofts, Michael St. J. Warne, Monica J.B. Amorim, Anne Fairbrother, Roman Lanno, William Hendershot, Chris E. Schlekot, Yibing Ma, and Graeme I. Paton</i>	
2.1	Introduction	7
2.2	Soil Factors Affecting Effective Dose	7
2.2.1	Background Concentrations	7
2.2.2	How Soils Affect the Availability and Toxicity of Added TEs	12
2.3	Conceptual Model of the Soil-Organism System	13
2.4	Implications for Setting Soil Quality Standards	15
2.5	Models of TE Uptake and Toxicity to Soil Organisms	16
2.6	Mechanistic Models	17
2.6.1	The Free Ion Activity Model and Biotic Ligand Model	17
2.6.2	Models Using Adsorption Isotherms	22
2.6.3	The Free Ion Approach	22
2.7	Empirical Toxicity Models	23
2.8	Direct Measurement of TE Pools	26
2.9	Consideration of Modifying Soil Factors in Soil Quality Standards	30
2.9.1	Differences between Laboratory and Field Conditions in Ecotoxicity Studies	33

2.10	Effects of Spiking Soils with Soluble TE Salts on Soil Solution Chemistry and Toxicity Measurements	34
2.11	Minimizing Spiking-Induced Artifacts in the Laboratory.....	36
2.12	Correction Factors for Existing Toxicity Data	37
2.13	Recommended "Best Practice" TE Dosing in Laboratory Ecotoxicity Experiments	38
2.14	Biotic Factors Affecting Organism Response to TE Dose	39
2.14.1	Quantity and Quality of the Ecotoxicological Data	40
2.14.2	Minimum Number of Ecotoxicity Data Points	43
2.14.3	Taxonomic Diversity Needed.....	43
2.14.4	Selection of Species.....	44
2.14.4.1	Use of Microbial Ecotoxicological Data for Development of SQS	46
2.14.5	Appropriateness of Toxicity Endpoints	50
2.14.6	Type of Ecotoxicity Data.....	51
2.14.7	Use of Acute and Chronic Data.....	52
2.14.8	Dealing with Multiple Toxicity Data for Species.....	53
2.14.9	Choice of Distribution for SSD	54
2.14.10	Level of Protection to be Provided.....	55
2.14.11	Acclimation and Adaptation.....	56
2.14.12	Mixture Considerations.....	56
2.14.13	Secondary Poisoning.....	61
2.15	Conclusions.....	63
2.15.1	Modeling	63
2.15.2	Measurement	65
	References	66

Chapter 3 Variation in Soil Quality Criteria for Trace Elements to Protect
Human Health: Exposure and Effects Estimation

*Beverley Hale, Nick Basta, Craig Boreiko, Teresa Bowers,
Betty Locey, Michael Moore, Marylène Moutier, Leonard
Ritter, Erik Smolders, Ilse Schoeters, and Shu Tao*

3.1	Introduction	81
3.2	Exposure Characterization	82
3.2.1	Background Exposure	82
3.2.2	Comparison among Jurisdictions	82
3.2.3	Proportion of Total Exposure Allocated to Background	83
3.3	Inhalation.....	85
3.3.1	Particle Size Domain.....	86
3.3.2	Particle Deposition	86
3.3.3	Toxicity	88

3.4	Soil Ingestion	89
3.4.1	Recommended Soil Ingestion Values for Children Based on Tracer Studies	91
3.4.2	Recommended Soil Ingestion Values for Adults Based on Tracer Studies	93
3.5	Food Chain Exposure	94
3.5.1	Land Use Scenarios: The Issue of Selecting Appropriate Background Exposure	95
3.5.2	Dietary Preferences	95
3.5.3	Soil-Plant Transfer	96
3.5.4	Soil-Crop-Animal and Soil-Animal Transfer	98
3.6	Statistical Characterization of Exposure	98
3.6.1	Probabilistic versus Deterministic Assessments	99
3.6.2	Uncertainty Factors	100
3.7	Essential TEs	101
3.7.1	Homeostasis and the Setting of SQSs	102
3.7.2	Dose-Response Relationships for Essential Elements	103
3.7.3	Interaction of Essential and Nonessential TEs	104
3.8	Bioavailability and Bioaccessibility	105
3.8.1	Use of In Vitro Gastrointestinal Methods to Estimate TE Bioavailability	108
3.9	Effects of Characterization	110
3.9.1	Benchmark Dose versus NOAEL/LOAEL	110
3.9.2	Bridging Ambient Exposure to Literature Doses	111
3.9.3	Sensitive Subpopulations	113
3.9.3.1	Children Subpopulations	113
3.9.3.2	Adult Subpopulations	114
3.10	Summary and Conclusions	114
	References	116

Chapter 4 Implementation and Use of Terrestrial Standards for Trace
Elements

123

*Graham Merrington, Ilse Schoeters, Michael St. J. Warne,
Beverley Hale, Victor Dries, Co Molenaar, Jaana Sorvari,
Jussi Reinikainen, Seung-Woo Jeong, Chris Oates, Gladys
Stephenson, Lucia Buvé, John Chapman, Diane Heemsbergen,
Randy Wentzel, Andreas Bieber, and Wang Guoqing*

4.1	Introduction	123
4.2	The Use of Soil Quality Standards	124
4.3	Frameworks for the Implementation and Use of SQSs for TEs	126
4.4	Accounting for Ambient Background Concentrations in the Implementation of TE SQSs	127

4.5	Accounting for (Bio)availability in the Derivation of TE SQSs	130
4.6	Accounting for Mixtures of TEs in Regulatory Frameworks	133
4.7	Monitoring and Assessment	134
4.8	Data Sources	134
4.9	Communication	135
4.10	Conclusions.....	136
	References	136
Chapter 5	Recommendations for the Derivation of Interpretable and Implementable Soil Quality Standards for Trace Elements	141
	<i>Graham Merrington, Ilse Schoeters, Michael St. J. Warne, Beverley Hale, and Mike J. McLaughlin</i>	
5.1	Introduction	141
5.2	Soil Quality Standards for TEs and Best Practice	142
	References	144
	Abbreviations	145
	Index.....	151
