Table of Contents

Foreword

Preface

Chapter 1 Introduction to Algorithms Complexity 11

1. Different types of complexity 12

2. Asymptotic Complexity 12

3. Landau Notations 13

4. Common time complexity functions 13

5. Properties 13

Exercises 15

Chapter 2 Dynamic Allocation and Linked lists 37

1. Dynamic Variable 38

2. Dynamic Arrays 38

3. Linked Lists 39

3.1. Singly Linked Lists 39

3.2. Doubly Linked Lists (Bidirectional Lists) 41

3.3. Circular Linked Lists 42

Exercises 43

Chapter 3 Stacks and Queues 85

1. Stacks 86

1.1. Representation of a stack in memory 86

1.1.1. Contiguous representation 86

1.1.2. Linked representation	87
1.2. Operations on stacks	87
1.3. Implementation in C for linked representation	89
1.4. Complexity	90
2. Queues	90
2.1. Representation of a queue in memory	90
2.1.1. Contiguous representation	90
2.1.2. Linked representation	91
2.2. Operations on queues	92
2.3. Complexity	94
2.4. Implementation in C for linked representation	94
2.5. Representation with circular array	95
Exercises	96
Chapter 4 Recursion	141
1. Recursive programming	142
2. Different types of recursion	142
2.1. Tail recursion	142
2.2. Non-Tail recursion	143
2.3. Multiple recursion (Tree recursion)	144
2.4. Nested recursion	144
2.5. Direct and Indirect recursion	144
3. Elimination of recursion	144
Exercises	151
Chapter 5 Trees	

1. Definitions and terminology	180
2. Binary trees	181
2.1. Traversal of binary trees	182
2.2. Binary Search Trees (BST)	183
2.3. AVL trees	183
2.4. Balancing	184
2.5. Binary heaps	185
2.5.1. Insertion into a max-heap	186
2.5.2. Deletion of the maximum element from a max-heap	186
2.5.3. Application of heaps	187
3. Operations on trees	187
Exercises	189
Chapter 6 Hash Tables	257
1. Direct address table	258
2. Hash table	258
3. Hash function	259
4. Collisions	259
5. Collision resolution	260
5.1. Separate chaining	260
5.2. Linear probing	260
5.3. Quadratic probing	262
5.4. Double hashing	263
6. Building hash functions	264

6.2. Hashing steps

Exercises
