Probability and Statistics

Lessons and solved exercises

Amar OUAOUA

University 20 August 1955-Skikda

This book is intended for first and second year LMD and Engineers students and preparatory classes for higher schools (in technology and management).

3	Bayes' formula	21
4	Exercices	21
3	Random Variables and Standard Probability Distributions	27
1	Random Variables	27
1.1	Various types of random variables	27
2	Common Probability Distributions(Usual Probability Laws) .	30
2.1	Common Discrete Probability Distributions	30
2.2	Common continuous probability distributions (Usuel Continuous Probability Laws)	36
3	Exercices	42
II	Statistics	47
4	Statistical Series with One Variable	51
1	Basic Definitions	51
2	Measures of Central Tendency	54
2.1	The Mean	54
2.2	The mode	57
2.3	The Median	58
3	Graphical Representations	60
3.1	Case of discrete variables	60
3.2	Case of continuous variables	61
3.3	Case of qualitative variables:	63
4	Positional Characteristics	63
5	Measures of Dispersion	65
6	Shape Characteristics	65
6.1	Asymmetry coefficient	66
6.2	Kurtosis Coefficient	68
7	Statistical Tables	68
8	Exercices	69
5	Statistical Series with Two Variables	79
1	Data Tables (Contingency Table) and Scatterplots	79
2	Marginal Distributions, Conditional Distributions and Co- variance	80

2.2	Marginal Frequencies	81
2.3	Marginal Means and Marginal Variances	82
2.4	Conditional Distributions	83
2.5	Conditional Means and Conditional Variances	84
2.6	Covariance	86
3	Linear correlation coefficient	87
4	Regression Line and Mayer's Line	87
4.1	Regression Line	87
4.2	Mayer's Line (or Method of Mean Points)	89
5	Regression curves, regression corridor, and correlation ratio	91
5.1	Regression curves	91
5.2	Correlation Ratio	93
6	Functional Adjustment	95
6.1	Power adjustment	96
6.2	Exponential adjustment	97
7	Exercices	98
8	Annex1: Solved Exams	107
9	Annex2: Terminology	129

Bibliography**133**
